## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of claims 1-9 in the reply filed on October 24, 2005 is acknowledged.

### ***Claim Rejections - 35 USC § 112***

2. Claim 4 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The equation is missing. Correction/clarification is required.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 5 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Meroni et al (US 5,771,560).

Meroni et al disclose a method for semi-endless rolling by casting a metal strand, which is cut to a length as required after solidification, wherein the cut lengths of cast strand are fed into a roller hearth furnace for heating and homogenizing at rolling temperature and are then fed

Art Unit: 1725

at rolling temperature into a rolling mill to be rolled out, wherein the continuous casting is continued without interruption during the rolling operation, and wherein a sufficient buffer time for a roll change is maintained in the rolling mill, wherein, to carry out a roll change, the casting rate is reduced as a function of the feed rate of the rolling mill. The coils are produced from a multiple length. The final rolled thickness or the feed rate of the rolling mill is increased between rolling campaigns within a casting sequence after the strand has been cut to length (col. 4, line 50 – col. 5, line 29).

***Allowable Subject Matter***

5. Claims 4, 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
